

ENVIRONMENT

 **prointec**

It is now over 25 years that PROINTEC MEDIO AMBIENTE (Prointec Environment) stands as a byword for quality and teamwork versatility. More than 600 contracts have been carried out worldwide to their owners full satisfaction, using to advantage the mentioned resources for the successful completion of projects funded by rather demanding Agencies.

Team-strength.

PROINTEC MEDIO AMBIENTE has available a multidisciplinary, wide-ranging team of experienced and continuously updated professionals, who own both knowledge and expertise, and is ready for immediate engagement in projects.

Pragmatic approach.

For PROINTEC MEDIO AMBIENTE staff, drawing up flexible, consensus-issued and effective documents that welcome suggestions are our main aim for the development of the proposed actions.

Added values.

As part of a large engineering and consulting company, PROINTEC MEDIO AMBIENTE contributes not only experience, equipment, tools, know-how and answers to problems, but it has available, too, all the technical means required for a proper project undertaking.

Quality assurance of the works.

In PROINTEC MEDIO AMBIENTE, works are subject to highly strict quality controls throughout their execution.

OPERATIONS SCOPE

WATER

Physicochemical and biological quality monitoring of water resources

Discharge monitoring

Processing of discharge permits and monitoring records

Drinking water production, sanitation and wastewater treatment

COASTS

Shoreline and coastal water reclamation

Planning of coastal area management

Environmental integration of maritime infrastructures

Marine ecology surveys

WASTE

Management plan development

Waste characterisation

Design and supervision of construction and operation of recovery and disposal facilities

Landfill gas for energy generation

SOIL

Environmental site assessment

Contaminated soil and groundwater characterisation

Environmental and public health risk assessment

Remedial action design, supervision and control

AIR AND NOISE POLLUTION

Control of air and acoustic pollution: emission and inmission

Noise measurement and mapping

Design of noise attenuation and abatement measures

Design of gas and fume treatment units

RECLAMATION

Water catchments and rivers

Areas affected by mining operations

Areas affected by works

IMPACT

Physical environment surveys

Strategic environmental assessment of plans and programmes

Environmental impact assessment

Environmental supervision of infrastructures during construction and operation phase

INDUSTRY

Treatment facilities design

Environmental audits

Emission and discharge monitoring

Waste minimisation programmes

Study and design of changes in industrial and energy-related processes

Assistance to apply for environmental permits

LAND

- Regional land planning and development
- Strategies for sustainable development
- Follow up planning and indicators design
- Protected areas planning and management
- Landscape surveys
- Regional planning for tourism locations development
- Tourism resources catalogue and use to advantage

MANAGEMENT

- Environment management systems
- Agendas 21
- Assistance to public agencies for fund management
- Evaluation of public plans, programmes and projects
- Institution strengthening and training in environmental-related areas

SERVICES

- Surveys, reports and evaluations
- Control and supervision
- Planning and projects
- Consulting and backup for public management
- Sampling and testing

Fields of Operation

TRANSPORT INFRASTRUCTURE

ENVIRONMENT

BUILDING AND URBAN DEVELOPMENT
